

Capture.

Making a great looking photo ID card just got easier with ImageWare's smart face finding technology. When capturing a photo, EPI Suite Pro automatically locates the face, then centers, crops and enhances the quality of the image, ensuring consistent, professional-looking photos for every ID card. ImageWare has also developed a custom camera driver that captures a photo and transfers it into the database in just one click, significantly speeding and simplifying the ID card enrollment process.

EPI Suite Pro can store as many as 15 images per person. These images can include not only digital photos, but fingerprints, signatures and more. In addition to digital photos, EPI Suite Pro can work with photos that are scanned, captured live with a camcorder or imported from a file system database. A Wizard-driven utility assists users with importing images and/or text information from other databases.

Design.

With EPI Suite Pro, you don't need a degree in graphic design to produce attractive ID cards. EPI Suite Pro comes with ten pre-configured card designs—or users may custom create an unlimited number of full-color, dual-sided card designs.

EPI Suite Pro also comes with a variety of design tools that enable users to: add bar codes and magnetic stripes to card designs; import graphics for backgrounds; add logos and text; apply fading or transparency levels to images; convert images to gray scale or black and white; and use a mesh pattern feature to provide a ghosting or "watermark" effect. Backgrounds can even be removed from photos, giving them a floating effect. Designs can also include areas that contain header/footer information and exclusion areas to prevent ink from being applied over security features such as smart chips, holograms or signature pads.

EPI Suite Pro also enables users to make global edits to layouts and will automatically resize all elements to adapt with a new printer, with no manual editing whatsoever.

Manage.

Unlike other ID software products on the market today, EPI Suite Pro manages person information separately from card information, which makes searching for and sorting records faster and easier. Additional database management tools

enable users to assign multiple cards to one person without having to re-key person data; conduct searches and sort information based on user-definable parameters; enter person information into the system before assigning a card type; and search for and reprint cards in seconds. Searches can range from simple to complex and can be saved for quick future reference. And EPI Suite Pro is password protected for added security.

Print & Encode.

EPI Suite Pro accommodates dual-sided and batch printing; prints multiple cards per sheet; and will encode bar codes, magnetic stripes and smart chips inline with the printing process. When encoding cards, users simply need to select the printer model being used—no additional configuration is required.

In addition to ID cards, EPI Suite Pro can print a number of reports including: audit reports, detail reports on cards by their format type; cards printed by date; database image statistics; personnel detail and image reports; card detail reports; reports on people in the system without images; and many others.

Minimum System Requirements:

Windows 98SE & NT 4.0: Pentium I Class Computer, 32 MB RAM
Windows 2000 Professional & XP Professional: Pentium II Class Computer, 64 MB RAM
CD-ROM drive
100 MB free disk space
20 KB per person
100 Bytes temp space per database record
16-bit color or higher SVGA graphics
800 x 600 screen resolution
1 parallel or USB port
Mouse

Optional:

Frame or video grabber board (compatible with Video for Windows or TWAIN, and SVGA card)
TWAIN compliant scanners or fingerprint acquisition devices
TWAIN or VFW compliant digital cameras
TWAIN or WINtab compliant signature devices

Ask about our custom services

- Biometric, bar code & encoder plug-ins
- Incorporation of background checks
- Web-based remote enrollment applications
- 3rd party integration with Access Control and HR Systems
- Plus many more
